LED STRIP SERIES

TBD.TS96

7.9W HIGH POWER INDOOR LED STRIP

TBD.TS96 is a linear lighting system optimal for areas where high-intensity levels of light are desired. This triple width LED configuration creates a Super High Output strip, with over 900 lumens at 7.9 Watts per foot. Great for many indoor commercial / residential applications. With several LED color options and 120° beam spread, this LED strip is a superior option for areas that can accommodate a super wide channel: coves, cabinets, ceiling slots, vanity mirrors. This strip, with high density LED spacing, when used with a deep channel and frosted lens, virtually eliminates all hot spots.
